How to get rid of an unwelcome lodger

modern in mood-perfectly brewed!

The Sun Machine you see above produces heat and glare more powerful than Sahara Desert Sunshine

Putting on the heat to bring you lasting interior beauty

At the Ford Oakville Assembly Plant, swatches of fabrics and vinyls revolve in the Sun Machine's fiery cave. Months and months of exposure to unearthly heat and glare are duplicated in days. This quality control test checks the fade resist-

inis quanty control test cheeses the hate resist-

ance of every batch of upholstery and trim material destined for Ford-built cars.

As a result of rigid quality control standards and continuing research, your Ford-built en offers you upholsteries and trims that shrug off years of wear and exposure. Look into any member of the Ford Family of Fine Cars—you'll see lasting interior beauty everwhere.

Sun, rain, dew—even the air—attack a car's beauty. That's why Ford of Canada duplicates the elements to check and test fabries, paints, plastics, chrome, rubber and metals. Many of these tests—and they're the toughest in the industry—were invented by the Ford organization.

Stringent quality control extends to every aspect of manufacturing a Ford-built car. On Ford of Canada assembly lines there are more than 390 quality control checks to see that every term meets exacting specifications. Even those checks are subject to check. "OK for Delivery" cars are taken of the end of the assembly lines at unannounced intervals and re-inspected from humper to bumper, from road to roof. It takes more time and it takes more men, but the end result is plain to see: Ford-built it well-built.

To complete the picture, your Ford of Canada Dealer is prepared to see that your new Fordhuilt car will give you complete satisfaction.

FROM START TO FINISH FORD-BUILT IS WELL-BUILT
